In 2004, EPA launched SmartWay - an innovative brand that represents environmentally cleaner, more fuel efficient transportation options. PPG is an Affiliate Member of SmartWay.

Managing project cargoes on a global basis, the scope of services we provide embrace all the elements of the logistics chain from factory collection right up to delivered destination site. Organising safe, cost-efficient transport of project cargoes is always a challenge, but PPG has the answers. PPG members have the expertise to provide clients with fully integrated logistics management solutions on a global basis that ensures every piece of the puzzle is taken into account.

PPG is also focusing on contributing to green transportation, particularly eco-friendly transport solutions supported by the United States Environmental Protection Agency's SmartWay Transport Partnership. PPG will closely engage with clients to encourage reduced greenhouse gases and air pollution through enhanced supply chain efficiency. We believe that through our international membership, PPG can make a significant contribution in this regard.
